DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statements submitted on 08/27/2003 and 08/07/06 have been considered by the Examiner and made of record in the application file.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966) that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the Claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35

U.S.C. 103(c) and potential 35 U.S.C.102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 is rejected under 35 U.S.C.103 (a) as being unpatentable over **Malki et al.** (US Pub # 20010046223 A1) in view of **Ono et al.** (U.S.Pub # 20030053453 A1).

Consider claim 1, Malki et al. clearly show and disclose mobile communication network system (figure 3) comprising a plurality of nodes (Paragraph 0030 and figure 3) including a home agent 345, a correspondent node 335 (Paragraphs 0030, 0045 and figure 3) and a mobility anchor point 375 (Paragraph 0030 and figure 3) connected to the network wherein restoration of a node from a failure is achieved by registering with more than one node (paragraph 0031 and figure 3). However **Malki et al.** fails to disclose the duplication of a binding cache on a receipt of a location registration and obtaining the contents of the binding cache from the duplicated binding cache.

In the same field of endeavor, **Ono et al.** show and disclose maintaining copies of a binding cache (upon registration) at the node and using the copies to optimize a transferring route (Paragraph 0045).

Therefore, it would have been obvious to a person of ordinary skill in the art at the time of invention was made to incorporate the duplication or copying of a binding cache at a node as taught by **Ono et al** in the method of **Malki et al** for the purpose of achieving faster recovery in case of a node failure.

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4 – 7 are allowed.
